The mean of a probability distribution is the long-run arithmetic average value of a random variable having that distribution. In this context, it is also known as the expected value. For a discrete probability distribution, the mean is given by  $\sum x_i p_i$ , where the sum is taken over all possible values of the random variable and  $p_i$  is the probability mass function.

Didone, or modern, serif typefaces, which first emerged in the late 18th century, are characterized by extreme contrast between thick and thin lines. These typefaces have a vertical stress and long and fine serifs, with minimal bracketing (constant width). Serifs tend to be very thin, and vertical lines very heavy.
